

It's Not A Door

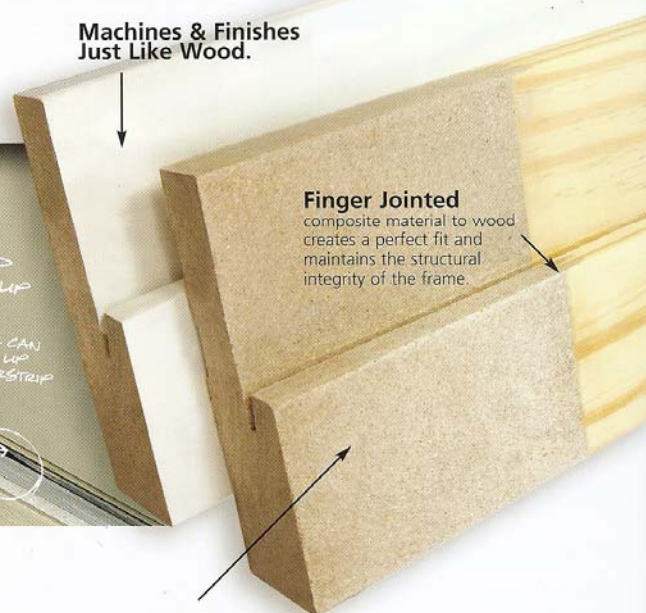

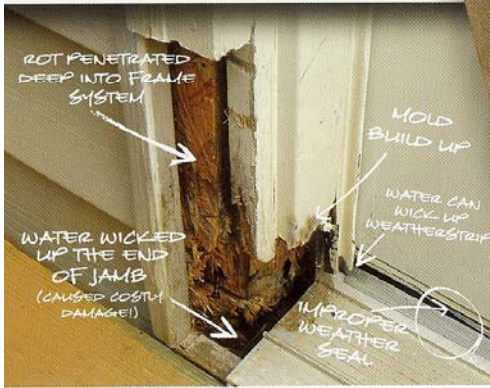

Z SERIES DETAILS

ROT PROOF SOLUTIONS FOR YOUR HOME

Protecting the base of exterior frames is the idea behind our patented **FrameSaver®** technology. A revolutionary wood composite material so resistant to rot and insect damage, we guarantee the frame for life.

Machines & Finishes Just Like Wood.

Composite Material won't absorb water like wood, and prevents bottom of the frame from ever rotting.

Guaranteed For Life. Revolutionary wood composite material is so resistant to rot and insect damage that it is guaranteed for life.

Without Endura.

ADA SILLS DETAILS

Patented Dam Feature provides the most effective method for preventing air and water infiltration through a doorway.

Screw Bosses allow for easy attachment of jambs for lasting support.

ADA Compliant Silks offer performance and features previously unavailable for an ADA application.

- A better seal is created between the door and the sill with a dam that meets ADA height requirements while still providing ease of entry.
- Modular design offers ability to use repositionable inactive caps to create a variety of multiple opening door units from the same SKU.

Weather Sealing Products (Door Bottoms, Simple Solution Corner Pad, Weatherstrip)

With our line of tested weather sealing products, all you have to do is the simple installation. The products will do the rest.

- Resilient and durable
- Form-retaining
- Dual Bulb design door bottoms
- Consistent compression
- Innovative wedge designed corner pad provides tight fit with weatherstrip

Alumawood Astragals

The Alumawood Astragal is made of an aluminum and wood assembly, which is easily painted and is provided with a flip-style bolt lever for assured security.

- Aluminum offers durability and strength for a lasting rot-free appearance.

FEN (Full Exposed Nosing) Silks are Efficient.

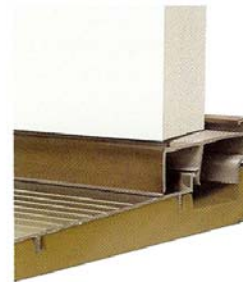

- By utilizing modified composite substrates and nosing, Endura is able to deliver cost-effective Z-Series silks with proven performance.

60 & 70 Series Sidelite Seats

(60 & 70) Protects and seals bottom of sidelite panel better and more efficiently than putting a door bottom on an inactive cap.

- Designed to be glazed in to stop of jamb. 70 Series - used for direct application to seal against glass sidelite panel.
